

Manual vertical panel saw

42-22

42-22

42-22 with supporting plate „MFP“ (option)

- for rectangular cutting and grooving in bending point in:
 - compact aluminium
 - aluminium composite panels (ACM, ALPOLIC, ALUCOBOND, ETÁLBOND, LARSON, REYNOBOND)
 - polycarbonates
 - plexiglas
 - plastic
 - PVC
 - sandwich panels like Corian
- stable construction, precise cutting unit, cutting and milling of high quality
- low costs, excellent performance, high reliability, simple operation

Štandardná sada

- standard tool set requires tool change if different kind of operation has to be performed

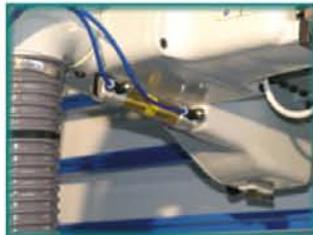

Sada "SCU"

- SCU device makes it possible to switch between blade and cutter without necessity to demount them for different kind of machining

- manual switch between blade for cutting and cutter for grooving of „SCU“ device

- grooving cutter is activated by means of a pneumatic cylinder

- control unit
