

EXPRES VR

Motor driven vertical rotary
and transport station

Motor driven vertical rotary and transport station EXPRES VR

Device for fully automatic vertical transportation of window and door frames in the production lines as a part of modular systems EXPRES and TRIUMPH.

- Depending on its configuration, the device serves for in-feed and out-feed of the frames with hinged sashes out of motor driven vertical trolleys or buffers.
- Window size from 400 x 400 mm to 3 000 x 3 000 mm.
- Conveyour belts with higher operating life – suitable for long-term usage.
- Option: connecting with buffer systems INDEX or SORTEX.

Machines for machining of ALU, Fe and PVC profiles
