

# APH-1LV

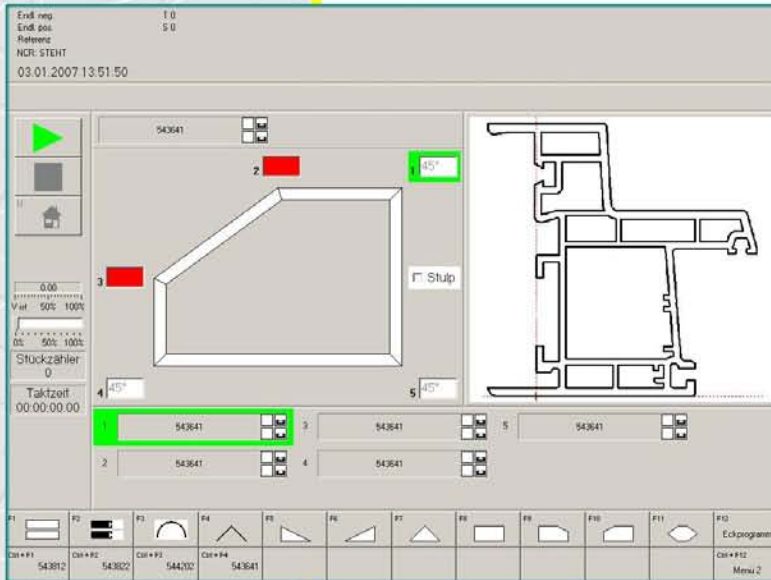

## CNC corner cleaner

CNC corner cleaner APH-1LV

- For the fast, precise and automatic corner cleaning of PVC window elements with various corner angles in non-standard window production
- Machining of all angles between 30°-160°, max. profile width 130 mm, max. profile height 180 mm
- Positioning of tools through advanced linear technology
- Full automatic adjustment of the machine for angle or arch, data input via keyboard, USB-stick or network
- Modular tooling with up to 22 tool slots
- Advanced control technology to Windows XP-based
- Easy import of new profiles, even without knowledge of CNC, through the use of self-developed Picture Programming

- Detail of communication by Picture Programming
- Only basic data about the angle and profile number are needed for full automatic angle adjustment of profile back fences and for automatic calculation of new path of machining tools.

- Enough space for tools enables to prepare the machine for machining of wide range of profiles in non-standard window production
  - for cleaning of profiles with or without gasket
  - for cleaning of MD and AD systems
  - for cleaning of monoblocks
  - for sash overlap routing
  - for cleaning of acrylic coated profiles
