## Drilling and Milling Automatic Machine

# PANTOMAT

Drilling and Milling Automatic Machine PANTOMAT

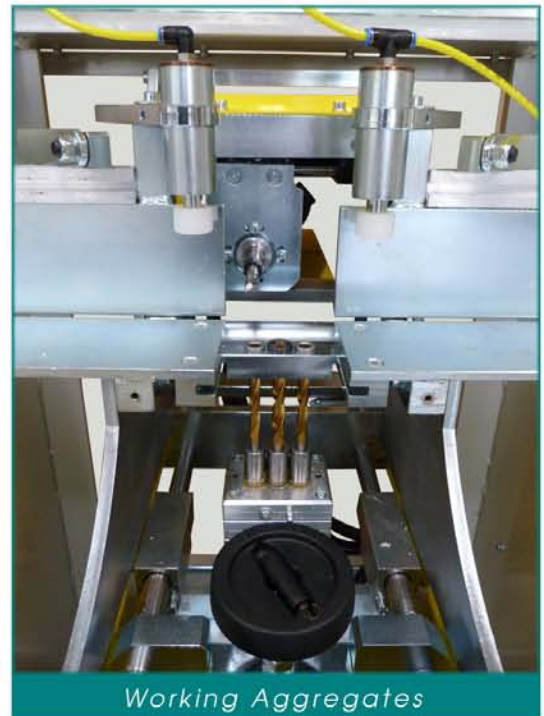

- High productive, precise and safe milling of lock case pocket and drilling of window crank span.
- Feasibility of work on central midpoint or graded dimensions of fittings.
- Fully automatic operation enhances quality and rationalizes production.

Profile Machining

- change-over switch makes it possible to use units also independently
- uniformly adjustable working movements
- quick feeding of material to the drilling unit
- hydraulic deadening of drills in cut, with stepless control of movement

- simple, quick and precise adjustment for various different profiles
- working table with built-in measures
- high safety of work

Working Aggregates

			1 x D 2 x d						1 x
400/230 V 50 Hz	1,1 kW	D = 640 RPM d = 810 RPM	D = 12 mm d = 10 mm	0,67 kW	stepless controllable 15.000 RPM	D = 12 mm d = 8 mm	6 ÷ 8 Bar	a = 1100 mm b = 1100 mm c = 1350 mm	250 kgs
