# Copy router PD

*Copy router PD*

- Wide using range for machining of ALU and PVC profiles
- Copy routing 1:1 ratio. Template reflection is result of processing on workpiece.
- Rectangular routing possibility by means of length, side and vertical stops with degree scales.
- Manual positioned graded copy pin for different cutter diameters.

Machine in operation.

- pneumatic clamping of material
- ever-present scales are assumption of quick and precise machine set up
- copying slide supported on linear bearings ensure long-term quality of machining
- easy, effortless two hand operation by means of two operating levers

Template / Rectangular copying

- universal copying template includes standard components for production of windows and doors
- template and working tool centering make easier reading and specify result
- accurate template of non standard forms according to customer inquiries will be produced by CNC cutting off laser machine
- two independent copy points and graded diameters of points  $\varnothing 5$  mm,  $\varnothing 8$  mm,  $\varnothing 10$  mm
